Ogden, Aug. 10,

CHILD'S PECULIAR DEATH. Symptoms of Polsoning, But No Poison.

Great American Importing Tea Co. About 2 o'clock yesterday morning Wealthy Pincock, the 4-year-old daughter of Charles Pincock, died from the ter of Charies Pincock, died from the effects of a peculiar malady. Her elder sister was also taken ytolendly ill, but the effects of physicians saved her life. The exact nature of the poison, if such it was, and how it was administered to the children is a mystery. The yard is full of various kinds of flowers, and a theory advanced is that the little eness are of the bloesoms and were poisoned thereby. An emetic, which saved the life of the elder child, however, did not develop anything of a poisonous nature. The children were seized with fainting swells and turned black in the face, requiring every effort of the physicians to arouse them.

The funeral services over the remains of the little girl will be held at the residence of John Pincock, on Thirty-third street, at 3 p. m. today.

Rome, Aug. 10.—Dr. Lapponi, the pope's physician, who returned from a vacation Aug. I, declares the pontiff is in good health. Do Your Children Thrive?

It is the business of children to eat and grow. If you have a child that eats well, but does not grow, or if its appetite is variable, you have cause to suspect worms. There are apt to be other symptoms. Face is pale, eyes are dull, steep is broken, child picks at its nose and is restless and fretful. Use White's Cream Vermiture. Everts worm will be Cream Vermifuge. Every worm will be destroyed and the child will be able to grow and develop as nature intended.
